

Notes 3

What is a graphical user interface (GUI)?

A Graphical User Interface is a type of user interface that allows people to interact with a computer through visual elements rather than text commands

What is a desktop environment?

A Graphical User Interface is a type of user interface that allows people to interact with a computer through visual elements rather than text commands

What is the command line interface (CLI)?

A Command Line Interface is a text-only way to interact with a computer. You type commands and the computer responds with text output.

How do I access the command line interface (CLI)?

press Ctrl + Alt + T or search for the terminal

What is a virtual console?

A virtual console is a built-in, text-only login session provided directly by the operating system kernel

What is a terminal emulator?

A terminal emulator is a graphical program that creates a window where you can use the CLI/shell. It emulates old physical terminals

What is bash?

a command language interpreter and scripting language

What is the shell prompt?

The shell prompt is the line of text that appears in the terminal before you start typing a command.

clear

clear # Clear the terminal screen

echo

echo "Hello, \$USER!" # Print text with variable

date

date +"%Y-%m-%d %H:%M" # Show date and time nicely formatted

free

free -h # Show memory usage in human-readable format

uname

uname -a # Show all system information

history

history | tail -n 10 # Show the last 10 commands you ran

man

man grep # Read the manual page for grep

tldr

tldr tar # Quick examples for tar command

cheat

cheat ssh # Show cheat sheet for ssh (if cheat is installed)

hostname

hostname # Display current machine name

df

df -h # Show disk space usage in human-readable form

du

du -sh ~ # Show total size of your home directory

figlet

figlet "Hello" # Display big ASCII text "Hello"
